I. Introduction

The City of Evans (City) is requesting proposals for topographical survey, boundary survey, ALTA survey, and survey of existing utilities to support design of a new consolidated wastewater treatment facility. The new treatment facility is to be located at their current Hill-n-Park (HNP) plant site and a new lift station and approximately 19,000 linear feet of new force-main will be constructed as part of the project. Figure 1 below shows the approximate project boundaries.

II. Purpose

The purpose of this request for proposal is to engage the services of a Licensed Professional Land Surveyor (PLS Licensed in Colorado) to provide surveying information to the City's WWTP design team to facilitate design and construction of the HNP WWTP, lift station and force-main improvements. The City expects the firm hired under this RFP to provide the services outlined hereunder and as defined in the final scope of work.

The City has an aggressive timeline to complete the consolidated WWTP improvements and it is expected that the firm selected will have the necessary resources to dedicate to this project to meet design timeframes. Surveying field work and deliverables are expected to be performed and delivered during April, May and June of 2015.

A LIDAR aerial survey and mapping file is available for all proposed sites and will be made available to the successful surveying firm. LIDAR topographic mapping contour intervals were measured to 1-foot accuracy. It is the desire of the City of Evans to have all topographic mapping completed on the same datum as the LIDAR survey information and the City's GIS data.

The City's existing ground network (and GIS data) is on the NAVD 88 datum. The selected surveying firm shall confirm all datum references and reconcile as necessary.

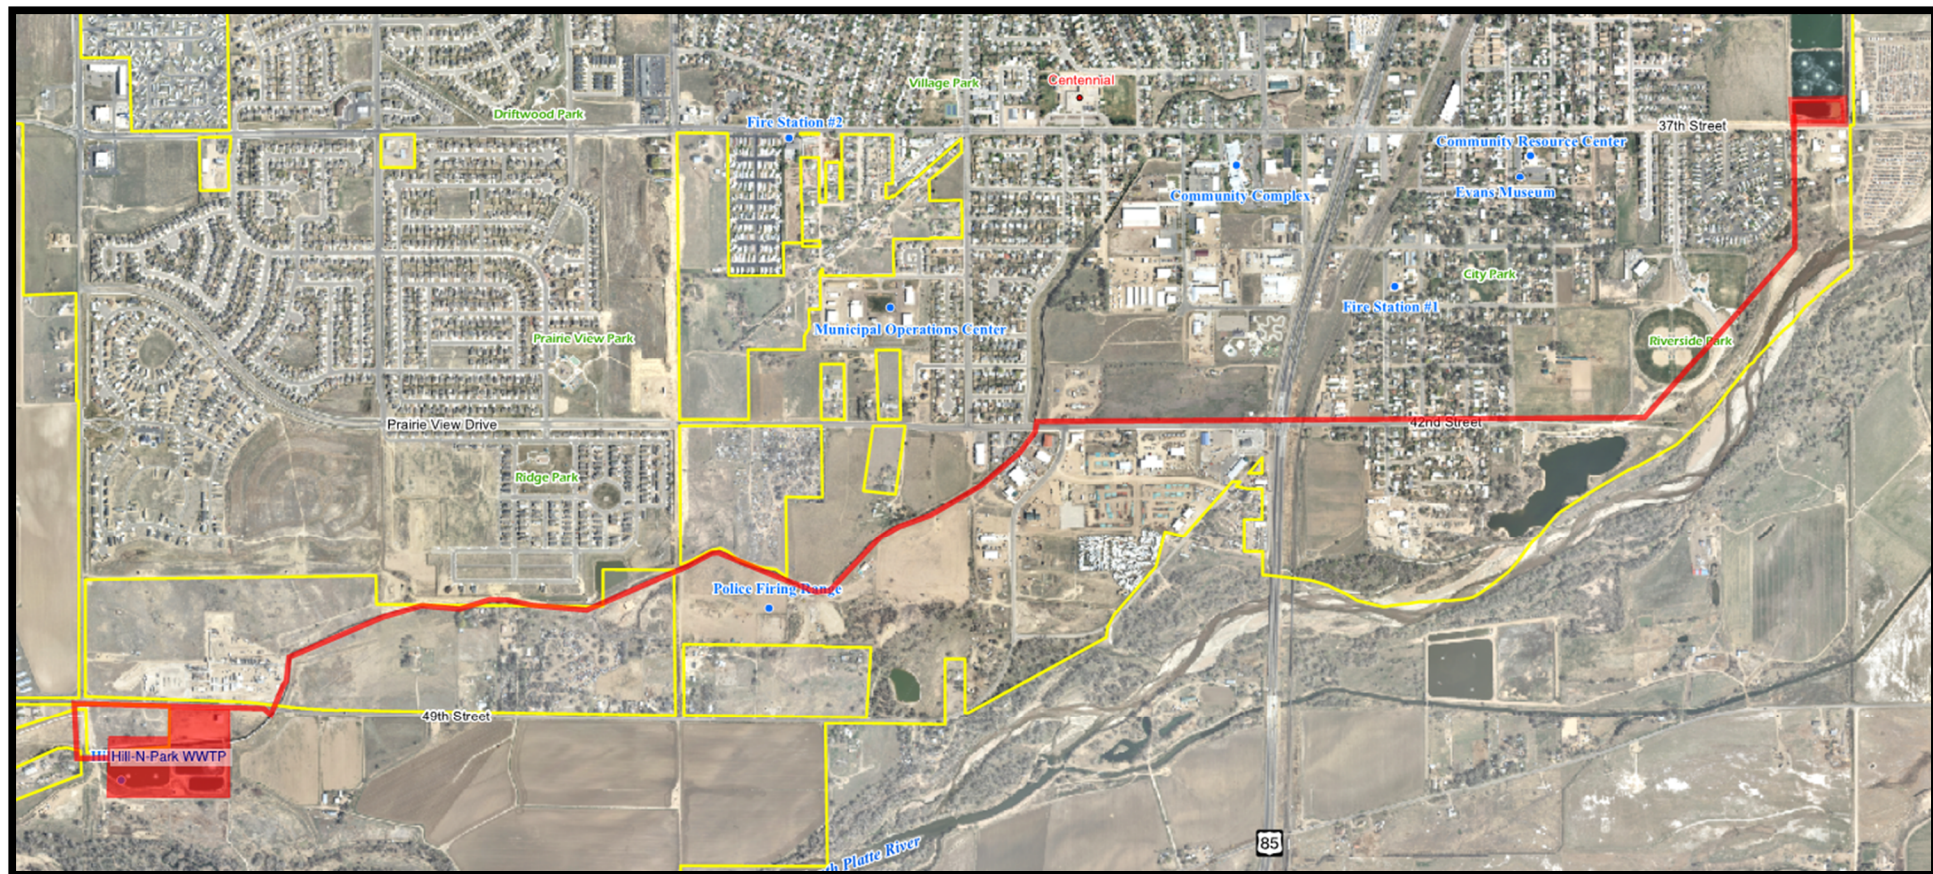

Figure 1– Approximate Project Location

- Verify LIDAR datum and match for all work.
- Provide contours to 0.5' (or greater) accuracy for site topographic survey. Provide all digital terrain model files as necessary.
- Provide topographical mapping along force main alignment for utility locating and potholing.
- Provide property boundary mapping for the lift station and HNP WWTP sites. Provide an allowance to identify boundary information for up to 10 private properties along the forcemain route. Provide boundary survey information along the Evans ditch.

Perform ALTA Survey of the HNP WWTP Site

The Consultant will be expected to prepare a full ALTA survey of the HNP site. Current title work will be provided to the successful firm. The survey shall include but is not limited to:

- Boundary lines and full legal description of property.
- All existing easements on property.
- All utilities, existing building locations and existing site improvements.

Perform As-Built Survey of Existing Utilities at Lift Station and Force-Main Sites

The Consultant will be expected to coordinate and provide as-built mapping of all existing utilities at the lift station, HNP WWTP sites and along the force main alignment. Survey mapping shall include both public and private utilities. Survey work shall include the following:

- All utilities in 50' width along force main alignment (25' each side of alignment).
- All utilities within the lift station site and 100' radius outside the site.
- Consultant shall perform and coordinate utility notifications for marking.
- Consultant shall record all potholing location and depth recording and incorporate into final as-built survey. (Potholing to be performed under separate contract and is not to be included in this proposal)

The Consultant will be expected to provide surveying information coordinated with engineering consultant needs, the overall project schedule and coordinated with utility locations, geotechnical bore hole and potholing work.
